ACTIVITIES

GEOGRAPHY OF PRESENCE

OUR PRODUCTS

- Large-size equipment weighing up to 600 tons.
- Column-type devices ranging from 325 to 6,000 mm in diameter and weighing up to 600 tons.
- Tank equipment with a capacity of up to 500 m³ and weighing up to 600 tons.
- Devices with mixers made of various steel grades with a capacity of up to 200 m³.
- Heat exchangers with fixed grids, floating heads and U-shaped tube bundles.
- Block-modular equipment with control valves, instrumentation and service platforms.
- Non-standard equipment for individual technical projects across various industries.
- Stamped elliptical bottoms ranging from 159 mm to 2,200 mm in diameter and made of various steel grades.
- Power equipment and spare parts for it (HPP SPIRALS).
